

37th Medical Operations Squadron
"We Draw First Blood"

WHMC Chiropractic Clinic

MISSION:

To provide compassionate, comprehensive, continuing chiropractic care as well as actively promoting healthy communities to our Active Duty members.

What we do

Do you suffer from chronic headaches, back, neck, or joint pain? The Chiropractic Clinic may be for you. The Chiropractor is concerned with the skeletal structure, with emphasis on the spinal column.

Through accident or occupational requirements, the skeletal structure often becomes misaligned. Since all joints have nerves, it is assumed that nerves are interfered with and affect our function. Through the Chiropractic adjustment, the misaligned joints can be brought back to proper alignment, returning the body to a more normal state of being.

Muscle covers the skeleton, and can play a major role in causing pain and discomfort. Chiropractors use physical therapies, trigger point therapy, heat, cold, and exercise to treat muscle problems.

How to get an appointment

1. Chiropractic care is available to Active Duty military only.
2. Make an appointment with your Primary Care Manager (PCM).
3. Discuss your condition with your PCM and have them determine if Chiropractic care is a viable treatment option for you.
4. Once the treatment has been decided, your PCM will send a referral to our clinic.
5. After review of the referral, you will be called within a day or two for an appointment, usually the appointment is within a few days.
